Empathy Map Canvas

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviors and attitudes. It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example Canvas: Book Store Personal Profile

WHAT DOES HE THINK & FEEL? ----- "What should I read today to prepare for my upcoming semester?" Worried about overspending on textbooks and hardcover novels. Wants personalized reading recommendations matching unique interests. Anxious about delivery processing lags causing missing assignments.	WHAT DOES HE SEE? ----- Online store platforms lacking mobile screen optimization. Friends ordering digital copies or exchanging paperbacks. Chaotic search lists without clear categories or author filters. Static bestseller options ignoring local community favorites.
WHAT DOES HE HEAR? ----- Classmates discussing convenient bundle subscription services.	WHAT DOES HE SAY & DO? ----- Spends 30 minutes scrolling text lines only to quit empty-handed.

Influencers recommending trending books via social media clips.

Sellers reminding them to verify matching catalog ISBN values.

Asks online support groups for cheaper alternative store suppliers.

Abandons clunky shopping carts due to tedious verification checkouts.

PAIN (FEARS, OBSTACLES)

Hard to filter correct reading formats and target editions.

Uncomfortable checking out without secure multi-option payment profiles.

Wasted hours searching through unstructured stock tables.

GAIN (WANTS, SUCCESS METRICS)

Comfortable, ultra-fast 1-click ordering dashboard.

Accurate localized store delivery timeline updates.

Highly relevant recommendations and bundle saving rates.
