

Project Design Phase

Proposed Solution Template

Date	02/07/2026
Team ID	
Project Name	Book Store
Maximum Marks	4 Marks

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Students, researchers, and general readers face significant friction finding specific book editions, accessing localized reading recommendations, and managing delivery logistics across unoptimized, clunky digital book interfaces.
2	Idea / Solution description	A unified mobile-first e-commerce Book Store platform offering real-time ISBN/edition verification checks, smart inventory tracking across regional storefronts, interactive community review portals, and integrated shipping pipeline trackers.
3	Novelty / Uniqueness	Features an advanced automated metadata categorization engine that maps reading level parameters, alongside a specialized neighborhood peer-to-peer used book book-swapping network integrated directly into the commercial catalog.
4	Social Impact / Customer Satisfaction	Lowers academic barriers by offering low-cost digital textbook alternatives and transparent condition tracking for second-hand items, building a high-trust local reader network.
5	Business Model (Revenue Model)	• Direct physical & digital marketplace sales margins. • Tiered premium subscription tiers for monthly multi-genre reading book packages.

S.No.	Parameter	Description
		• Transaction commission fees from secondary marketplace peer-to-peer textbook trades.
6	Scalability of the Solution	The platform architecture utilizes cloud database frameworks and an open API layout pattern, allowing seamless expansions to support independent regional publishers and multi-city inventory scaling.
