Customer Problem Statement Template

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Reference: <https://miro.com/templates/customer-problem-statement/>

I am	Describe customer with 3-4 key characteristics - <i>who are they?</i>	An avid reader and university student who balances a tight weekly budget but requires diverse academic textbooks and fiction novels.
I'm trying to	List their outcome or "job" they care about - <i>what are they trying to achieve?</i>	Discover, sample, and quickly purchase budget-friendly books or local academic editions on my phone between classes.
but	Describe what problems or barriers stand in the way - <i>what bothers them most?</i>	The current mobile checkout system takes too many steps, and finding verified used book conditions or delivery dates is confusing.
because	Enter the "root cause" of why the problem or barrier exists - <i>what needs to be solved?</i>	The online bookstore website is completely unoptimized for mobile layouts, lacks live inventory statuses, and doesn't hold cart sessions.
which makes me feel	Describe the emotions from the customer's point of view - <i>how does it impact them emotionally?</i>	Frustrated, discouraged, and anxious about overspending or missing necessary book assignments before course deadlines.

Problem Statement (PS) Matrix

Below is the structured registry tracking detailed customer scenarios for the Book Store project deployment.

ID	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A busy local college student.	Order required syllabus textbooks instantly before the term starts.	The layout is clunky and hides estimated shipping arrival times.	The digital shop interface lacks responsive mobile scaling frameworks.	Anxious and frustrated.
PS-2	A casual fiction book collector.	Browse curated local community recommendations and staff choices.	The web view feels static and only displays generic best-sellers lists.	The database doesn't support localized tags or real-time community reviews.	Bored and uninspired.
PS-3	A parent searching for children's books.	Filter illustrated reading levels safely for multi-age kids.	The search query bar returns hundreds of chaotic, unfiltered results.	Metadata categorization tables for sub-genres haven't been mapped yet.	Overwhelmed and confused.
